

Radio Host:

If you've HAD it with ever-increasing monthly electric bills, you definitely want to take a listen to my next guest. His name is Ken Button from Verengo Solar. Hi, Ken.

Ken:

Hi, [first name].

Radio Host:

So, tell me, is there really a way to bring our electricity costs down?

Ken:

Absolutely, [first name]. There's NO reason for anyone to be saddled with runaway electric costs. Present rates are projected to increase 40% in the next 5 years..... How many paychecks do you think will be increasing 40% in that time?

Imagine a \$1200 a year increase on a current \$250 monthly bill.....Which part of your budget will take the hit for that--- Food? Car? Kid's college?

Radio Host:

So how can Verengo Solar help?

Ken:

Solar energy can save you thousands of dollars on your electric bill.

As a matter of fact, if we can't save you money, we won't take your business. A detailed 20-year cost per month quote we provide up front will determine that immediately. In most cases, you start at a rate lower than your current utility offers, and that rate stays low in coming years.....unlike the utility company's rate that continues to climb--- fast. So you save even more as time goes on!

Radio Host:

And why Verengo?

Ken:

We do our homework and we do the job right....it's why we're ranked the #1 Residential Solar Contractor in the U.S.....and why 97% of our customers recommend us.

Radio Host:

Tell me, Ken, how long does it take to hook up to solar? And what's involved with the panels?

Ken:

In a 5-minute phone call, we'll pull up your home's satellite image, ask a few questions, and schedule an appointment. Installation usually takes ONE day.

As for the panels?.....We provide all the equipment, installation, maintenance, repair, 24/7 support....and a 20-year guarantee.

Give us a call, and start reducing your electric bill now with no money out of pocket. But you'd better hurry if you want to take advantage of Verengo's \$1000 rebate and those hefty government rebates that are starting to disappear.

Radio Host:

So, why put it off when you could be saving thousands on your electric bill?

Hurry....Call Verengo Solar today---right now, in fact---at 800-408-8500. That's 800-408-8500.....800-408-8500.
